

1st International Congress of
Micro-Immunotherapy
18-20 May 2017, Mallorca, Spain

MEDIA INVITATION

**Welcome to the 1st International Congress on Micro-Immunotherapy
ICoMI 2017**

From 18 May to 20 May 2017, in Palma de Mallorca (Spain), on the topic:

**“Immunomodulation and chronic diseases through the prism of autoimmunity:
New concepts, new perspectives”**

By bringing together researchers, healthcare professionals and biologists, the **ICoMI 2017** International Congress provides a unique opportunity for scientists from all over the world to exchange and share knowledge on this innovative topic: immunomodulation in chronic diseases.

Immunomodulation: a highly promising therapeutic approach

Although chronic diseases present a significant challenge, the aim of the **ICoMI 2017** Congress is to present all the latest developments in the understanding of the link between autoimmune processes, pathologies and available care options.

Immunotherapy in general and, more specifically, types of therapy that use immunocompetent substances in small doses, such as micro-immunotherapy, offer a series of highly promising outlooks. Micro-immunotherapy aims to restore a balanced immune response by using low concentrations of cytokines and regulating substances (such as chemokines).

Who is affected by these developments?

All healthcare stakeholders, whether they be scientists, researchers or practitioners interested in immunomodulation-based therapies. Participating in this congress will help you to improve your professional practice by gaining valuable knowledge on the concept of autoimmunity thanks to new lines of research, new diagnostic tools and innovative therapeutic applications.

Invitation to the Media Briefing/Lunch Thursday, 18 May 2017, at 12:30 a.m

Come and meet the Scientific Director of the Congress, Doctor Pascal Mensah, as well as the Congress organisers and Presidents of the 3 Associations: Doctor Ursula Bubendorfer (MeGeMIT), Doctor Josepa Rigau (AEMI) and Doctor Jean-Maurice Clercq (3IDI). The meeting will shed new scientific light on the different areas to be presented at the **ICoMI 2017** Congress.
