

1st International Congress of
Micro-Immunotherapy
18-20 May 2017, Mallorca, Spain

PRESS RELEASE

Welcome to the 1st International Congress on Micro-Immunotherapy ICoMI 2017

From 18 May to 20 May 2017, in Palma de Mallorca (Spain), on the topic:

**“Immunomodulation and chronic diseases through the prism of autoimmunity:
New concepts, new perspectives”**

By bringing together researchers, healthcare professionals and biologists, the **ICoMI 2017** International Congress provides a unique opportunity for scientists from all over the world to exchange and share knowledge on this innovative topic: immunomodulation in chronic diseases.

Immunomodulation: a highly promising therapeutic approach.

Although chronic diseases present a significant challenge, the aim of the **ICoMI 2017** Congress is to present all the latest developments in the understanding of the link between autoimmune processes, pathologies and available care options.

Immunotherapy in general and, more specifically, types of therapy that use immunocompetent substances in small doses, such as micro-immunotherapy, offer a series of highly promising outlooks. Micro-immunotherapy aims to restore a balanced immune response by using low concentrations of cytokines and regulating substances (such as chemokines).

Who is affected by these developments?

All healthcare stakeholders, whether they be scientists, researchers or practitioners interested in immunomodulation-based therapies. Participating in this congress will help you to improve your professional practice by gaining valuable knowledge on the concept of autoimmunity thanks to new lines of research, new diagnostic tools and innovative therapeutic applications.

1st International Congress of
Micro-Immunotherapy
18-20 May 2017, Mallorca, Spain

PRE-PROGRAMME

Among the most remarkable interventions, we have the pleasure to welcome:

Professor Vincent Castronovo (Liege, Belgium)

Plenary Session: « Key roles of functional and nutritional medicine in the management of chronic inflammatory diseases».

Professor Victor Gabriel Clatici (Bucarest, Rumania)

Plenary Session: « Rosacea – Immunomodulation by antibiotics, laser therapy and nanotechnology”

Professor Alessio Fasano (Boston, Massachusetts, USA)

Plenary Session: « The role of nutrition, the microbiome, and gut permeability in immunomodulation: the celiac disease and type 1 diabetes paradigms”

Professor Torello Lotti (Rome, Italy)

Plenary Session: « Low-dose of cytokines and growth factors for the treatment of skin disease».

Professor Marion Schneider (Ulm, Germany)

Plenary Session: « Inflammatory macrophages and dendritic guiding cancer manifestation”

Professor Eliana Mariño Merino (Melbourne, Australia)

Plenary Session: “Gut microbial metabolites regulates autoimmune Tcell responses and protect against type 1 diabetes”

Professor Herman Waldmann (Oxford, England)

Plenary Session: « Reprogramming the immune system in autoimmunity and transplantation”
